## EDUCATION

**KJ Somaiya College of Engineering** *August 2021 - May 2025*
Bachelors in **Computer Engienering** **CGPA: 9.61/10.00**
Minor in **Robotics and AI**

## WORK EXPERIENCE

### Co-Founder and CTO *August 2024 - Present*
*Jumbl* *Remote*

- Co-founded and led the development of a consumer-facing referral platform serving 22,000+ users, driving 800+ successfully completed referral requests across mobile and web.
- Owned product execution end-to-end, translating user needs and business goals into clear feature requirements, MVPs, and iterative releases.
- Collaborated closely with design and engineering teams to ship and scale features across React Native mobile apps and a React-based web platform.
- Leveraged user feedback and behavioral insights to optimize onboarding, referral flows, and engagement loops, improving request completion and retention.
- Balanced product, engineering, and business trade-offs in a fast-paced startup environment while ensuring consistent, on-time delivery.

### Web Developer Intern *Aug 2023 – Dec 2023*
*Darwin, BioRiidl* *Mumbai*

- Owned delivery of the official website for an international event with participants from **65+ countries**, improving performance and cross-device responsiveness.
- Executed under tight timelines while aligning technical delivery with business and event goals.

### Web Developer Internship *June 2023 - Dec 2023*
*KJ Somaiya College of Engineering* *Mumbai*

- Built a web-based inventory management system used by multiple college laboratories.
- Worked with stakeholders to understand operational pain points and convert them into functional product requirements
- Improved visibility and efficiency in resource tracking through structured data flows and dashboards.

## PROJECTS

Expensease | *Expense Management App (Live on App Store & Play Store)* Full Stack Dev

- Built and launched a consumer-focused expense management app for group and personal expenses, live on the App Store and Play Store, with 160+ active users.
- Owned and implemented core product flows including expense creation, splitting logic, and settlements, enabling 800+ expenses to be tracked reliably.
- Continuously iterated on features using real user feedback to reduce friction, improve usability, and drive repeat engagement.
- **Tech:** Expo, React Native, React, Node.js, MongoDB, AWS

Name Place Animal Thing | Multiplayer Mobile Game (Live on App Store & Play Store) *App Dev*

- Designed and launched a real-time multiplayer mobile game with a strong focus on social interaction, achieving 800+ downloads.
- Built live gameplay and friend-based multiplayer features using real-time communication to drive repeat engagement and retention.
- **Tech:** Expo, React Native, WebSockets, Node.js

Personal Portfolio | Autonomous Developer Portfolio Web Development

- Designed and built an autonomous developer portfolio that tracks and showcases engineering activity in real time.
- Implemented AI-powered summaries to convert GitHub commits into professional project updates.

- Automated contribution scanning using scheduled workflows with privacy-aware filtering.
- **Tech:** Next.js 14, Tailwind CSS, GitHub Actions, OpenAI/Gemini APIs

Desktop Clipboard App | Productivity Desktop Application                                    App Dev
- Developing a desktop productivity app to enhance clipboard usage with smart suggestions and task organization.
- **Tech:** Electron.js, JavaScript

Chronos | Real-Time College Scheduling App                                                App Dev
- Built a mobile app delivering real-time timetable and assignment updates for college students.
- Focused on solving information fragmentation and improving day-to-day usability.
- **Tech:** React Native, Node.js, MongoDB

Client Websites | Business & Professional Websites                                        Web Dev
- Designed and developed professional websites for external clients across legal and manufacturing domains.
- Delivered responsive, SEO-friendly websites aligned with client branding and business needs.
- **Websites:** stlegalassociates.in, abhayproducts.in, boratechnologies.in, parriechhajed.in,

## TECHNICAL SKILLS

**Product & Analytics:** Product requirement definition, MVP scoping, user journey mapping, funnel analysis, event tracking, experimentation mindset, data-informed decision making
**Frontend Development:** React.js, React Native, Next.js, HTML, CSS, JavaScript
**Backend & APIs:** Node.js, Express.js, MongoDB, MySQL, REST APIs
**Cloud & Services:** AWS (EC2, S3), Firebase, Expo, Expo Notifications
**Programming Languages:** JavaScript, Python, C++, Java, C
**Tools & Platforms:** Git, Postman, Analytics SDKs, WebSockets, Electron.js
**AI & Integrations:** OpenAI API, Gemini API
**Strengths:** Problem solving, consumer empathy, cross-functional collaboration, execution in ambiguous environments
